

Polycoat Flowchem is one stop shop for all type of coating and lining needs for chemical, petrochemical and pharma industry.

We provide various type of chemical and corrosion resistant, high temperature linings and coatings like PTFE, FEP, PFA, PVDF, ETFE, ECTF etc.

Corrosion is the biggest enemy of chemical, petrochemical, pharmaceutical, food processing and any other industry where chemicals are used.

Advanced fluoropolymers like PTFE, FEP, PFA, PVDF, ECTF are virtually inert to most chemicals and solvents.

Fluoropolymer lined or coated valves, pipes and fitting, vessels are having dual advantage of strength of steel or metal and life of polymer. They can also withstand reasonably high temperature to meet harsh challenge of an industry.

Advanced polymer lined valves, pipes and fittings vessels, stirrers are used extensively in all the industry to transport, control and handling of highly corrosive media upto 260° C (500° F).

Our advance manufacturing and management techniques assisted by highly precise testing setup is capable of delivering the best of lined valves, pipes and fittings, corrosion resistant, non stick coatings at most reasonable price - quickly.

If you require any product to be lined, which is not in our standard range of manufacture, than please revert back to us with drawings and specifications, as our well equipped tool room is capable of providing you custom jobs, which are not so expensive.

Also please feel free to contact us for right selection of lining material, our application engineer will be glad to assist you.
